

Assignments of domainnames

To transfer a domainname to another holder, we demand that the current holder fills in a transmittion form (special form) and that the new holder fills in an assignment form.

- 1) Current holder fills in "Assignment – terminationform".
- 2) The new holder fills in "Assignmentform".
- 3) The registrar collects the forms and send in an electronic form to transfer@nic-se.se
- 4) The registrar sends the "assignment terminationform" to NIC-SE via fax.
- 5) NIC-SE will then collect the form and match it with the electronic form.

You will find all forms here:

https://www.nic-se.se/ombud_extranet_eng/forms.shtml

Certificate

To be able to do assignments on domainnames wich today doesn't have an existing holder NIC-SE will demand a certificate from the new holder. The new holder must convince NIC-SE why they have the right to register the domainname. The certificate shall then be faxed to NIC-SE.
